

# Builder

---

AI powered application building pipeline

## Installation

From the root of the project execute:

```
./Scripts/install.sh
```

or

```
./Scripts/install.sh CATEGORY
```

where **CATEGORY** can be on of the following categories:

- General
- Coder
- Tester
- Translation
- Generative/Animation
- Generative/Audio
- Generative/JPEG
- Generative/PNG
- Generative/SVG

*Note:* If none has been passed to the script, the **General** category will be used.
