TODOs

- For each category create debate AI group
    - Expose the debate group via Ollama for API access

In progress

- FIXME: Make sure that tests are running with no errors or warnings
- Integrate RAG with Fixers to pickup from out memory database
- Fixers: Support for Goose
- Fixers: Auto detection between AI CLIs sorted by priority - claude, goose, qwen, etc
- Web UI for tasks with APIs (instead of manual editing). After we create or edit task submit with confirmation sends it to execution to the AI
- Recipes for adding more tests (each test scenario is defined by the recipe)

Completed

- FIXME: Audio model for 7B does not exist on Ollama

- Make sure that every model before it is installed is checked if exists in Ollama, as fallback pull it and apply from Hugging Face

- TASK: 003 Testing Scripts

- FIXME:

    ```
     ✘ python3 Scripts/AudioTemplates/text_to_speech.py 'Hello, this is a test'
      Traceback (most recent call last):
      File "Builder/Scripts/AudioTemplates/text_to_speech.py", line 10, in <module>
          import soundfile as sf
      ModuleNotFoundError: No module named 'soundfile'
    ```

- Command for CLI AI has to be customizable with the def. val. and to run in headless mode

- Fixers: Add support for multiple `Fixers` - Besides `Claude` add `Qwen` as option/default one

- Add all Upstreams supported: GitLab, GitFlic, Gitee, GitVerse

- TASK: 004 Cover all models by all supported Builder categories

- Write log files during the testing
