TODOs

- For each category create debate AI group
  - Expose the debate group via Ollama for API access

In progress

- Web ui for tasks with APIs (instead of manual editing). After we create or edit task submit with confirmation sends it to execution to the AI
- Command for CLI AI has to be customizable with the def. val. and to run in headless mode
- Auto detection between AI CLIs sorted by priority - claude, goose, qwen, etc
- Recipes for adding more tests (each test scenario is defined by the recipe)

Completed

- FIXME: Audio model for 7B does not exist on Ollama

- Make sure that every model before it is installed is checked if exists in Ollama, as fallback pull it and apply from Hugging Face

- TASK: 003 Testing Scripts

- FIXME:

```
✘ python3 Scripts/AudioTemplates/text_to_speech.py 'Hello, this is a test'
  Traceback (most recent call last):
  File "Builder/Scripts/AudioTemplates/text_to_speech.py", line 10, in <module>
      import soundfile as sf
  ModuleNotFoundError: No module named 'soundfile'
```
